

JGM:JG:JGSP Cylinders

- Horizontal single or double acting, non-cooled compressor cylinders.
- Plugged indicator cock connections on the head-end and crank-end of most cylinders
- SAE series 4100 steel piston rods, ion-nitrided with rolled threads. 17-4PH stainless steel piston rods available as an option
- Pistons of scuff-resistant gray iron or ductile iron
- Non-metallic piston rings
- Pistons with piston/rider rings standard for 13-1/2JG and 1-3/4M-FS cylinders, and available as an option on all other M, P and JG cylinders. (See [Piston Rings, Piston/Rider Rings & Wear Bands](#))
- Full floating, vented rod and wiper packings
- Profiled plate type valves with non-metallic valve plates.
